

Below is a letter to the Canadian members of Parliament who sit on the Standing Committee on Health (HESA).

In June 2015, the former members of HESA published the report [\*\*RADIOFREQUENCY ELECTROMAGNETIC RADIATION AND THE HEALTH OF CANADIANS\*\*](#) which raised great hope but whose recommendations were not implemented by Justin Trudeau's Liberal government on advice from Health Canada officials who perpetuate Michael Repacholi's legacy.

**From: "Jerry Flynn" <[jerryjgf@shaw.ca](mailto:jerryjgf@shaw.ca)>**

**Object: Radiation from mobile phones and 'smart' meters cause cancer!**

**Date:** 29 June 2017

**To:** <[Bill.Casey@parl.gc.ca](mailto:Bill.Casey@parl.gc.ca)>, <[Len.Webber@parl.gc.ca](mailto:Len.Webber@parl.gc.ca)>, <[Don.Davies@parl.gc.ca](mailto:Don.Davies@parl.gc.ca)>, <[Ramaz.Ayoub@parl.gc.ca](mailto:Ramaz.Ayoub@parl.gc.ca)>, <[Colin.Carrie@parl.gc.ca](mailto:Colin.Carrie@parl.gc.ca)>, <[Doug.Eyolfson@parl.gc.ca](mailto:Doug.Eyolfson@parl.gc.ca)>, <[Rachel.Harder@parl.gc.ca](mailto:Rachel.Harder@parl.gc.ca)>, <[Darshan.Kang@parl.gc.ca](mailto:Darshan.Kang@parl.gc.ca)>, <[John.Oliver@parl.gc.ca](mailto:John.Oliver@parl.gc.ca)>, <[Sonia.Sidhu@parl.gc.ca](mailto:Sonia.Sidhu@parl.gc.ca)>

Dear HESA members,

Honest, decent people can't imagine that just one corrupt scientist could wreak as much havoc on the world's entire population as Dr. Michael Repacholi has done! But history does not lie. Dr. Repacholi had been Director of Health Canada's Radiation Protection Bureau until 1983, when he moved to the WHO, where he remained until he retired in 2006. In 2002, while still at the WHO, he 'founded' ICNIRP (International Commission for

Non-Ionizing Radiation Protection), becoming its inaugural Chairman (for which he is now Chairman emeritus). In 1996, Dr. Repacholi headed up the WHO's 10-year, USD \$250-million study of EMFs, in which he involved the US Military and Industry. <http://www.saferemr.com/2013/05/upcoming-who-meeting-on-radiofrequency.html>. Consequently, he was instrumental in setting essentially the same 'safe' radiation Exposure Limits (for frequencies from 0 to 300 GHz) first for Health Canada, then for ICNIRP, and then for the WHO! All of which were acceptable to the US Military. It is important to note, these 'safe' exposure limits protect ONLY against the heating or thermal effects of radiation! All three organizations studiously avoid even mentioning non-thermal effects – which are emitted by powerline (60 Hz) electricity, electric power infrastructure, 'smart' meters, 'smart' appliances, and the full range of consumer wireless radio products / devices, etc.

Because it does not – and will not - acknowledge that there are non-thermal effects to radiation (which non-industry scientists have long-known cause harmful biological and health effects to people and other forms of life), Health Canada's Radiation Protection Bureau –

- Fails to “protect the people of Canada” against non-thermal radiation!
- Tells the public that cell phones, cordless phones, 'smart' meters, etc. are safe, when they absolutely are not!
- Refuses to impose the Precautionary Principle to protect the public from the known hazards of non-thermal radiation, especially when it is pulsed!
- Tells the public that powerline (60 Hz) electromagnetic fields are safe, when they absolutely are not!
- Refuses to recognize a condition known as electro-hypersensitivity or EHS, which afflicts at least 3% of the world's entire population!
- Provides no protection for those already suffering from EHS.
- Continues to befriend Industry and the US Military while harming the uninformed, defenseless people it is paid to protect - the people of Canada!

Evidence to support the above, very serious allegations is provided in the Appendix below.

---

## **My BIO**

I am a retired Canadian Armed Forces captain who spent 22 of my 26+ years in Canada's military in the arcane fields of Electronic Warfare (EW) and Signals Intelligence (SIGINT). My security clearance was "Top-Secret (code word)". My most relevant appointments included: two years in National Defence Headquarters in the Directorate of Electronic Warfare (DEW), where I was the sole EW officer charged with supporting Canada's only army EW Company. For two years I worked closely with U.S. and NATO army EW units and completed, at my own initiative, a lengthy NATO army EW officers' course in Anzio, Italy. Later, I participated in a major NATO army EW officers' field exercise in Germany (again, at my own initiative). While in DEW I accepted invitations to visit the U.S. Pentagon and, separately, Fort Bragg, N.C., the U.S. Army's major EW base. My previous two-year posting was in the SIGINT world, for which I was personally sought out and asked if I would assume the duties of both Executive Officer and Operations Officer at one of Canada's largest and most sensitive SIGINT radio stations. Here approximately 200 specially-trained radio intercept operators conducted either COMINT or ELINT under my direction. Throughout this period I worked closely with the USA's NSA and, to a lesser degree, with Britain's GCHQ. Earlier in my career I conducted Radio Warfare (today's EW) at sea aboard two Canadian warships.

Sincerely,

J.G. ("Jerry") Flynn, Captain (Retired)  
5181 Gainsberg Road,  
Bowser, BC, V0R 1G0

## Appendix

### **Evidence Health Canada is Not Protecting the People of Canada\_**

Health Canada's 'Mission and Vision,' as stated on its website, is grossly offensive in that it makes a mockery of today's sick, evil reality. Why is the onus placed on an unsuspecting public (the victims) to prove that man-made pulsed non-thermal radiation (promoted and sold by electric power utilities and wireless/telecom companies) is harmful to humans and other living things? Why has Health Canada never made it mandatory for these companies to first prove their technologies are safe to be used by, on and around people – including embryos, pregnant women, children, youths, adults and the elderly – at all levels of wellness, 24/7/365 in perpetuity, before any of it is allowed to be used by industry and/or the public? New technologies must only be tested by qualified independent professionals having no ties or links to industry. And why has Health Canada never seen fit to impose the Precautionary Principle in order to protect the population from man-made non-thermal radiation? Were Health Canada not corrupt, the following would not have occurred.

In 2017, Dr. Lennart Hardell, MD, Ph.D., Sweden, the world's foremost expert on cell phone radiation and brain tumors urged the WHO to classify EMFs a 'Known Human Carcinogen' or Category 1. <https://lennarthardellenglish.wordpress.com/> <http://www.saferemr.com/2013/05/upcoming-who-meeting-on-radiofrequency.html>

In 2015, Professor Igor Belyaev, Ph.D., one of the world's top experts in the health effects of electromagnetic fields (EMFs), asked with chilling realism: *"If our countries do not want to fund independent EMF studies, are they governed by the telecom industry they seem to be protecting? EMF exposures from smart meters and other wireless devices cause cancer and drug companies reap all the profits."*

<https://maisonsaine.ca/english/microwaves-can-cause-cancer-or-be-beneficial-prof-igor-belyaev.html>

Since May, 2015, at least 225 scientists from 41 countries have signed the International EMF Scientists Appeal, addressed to the Director General of the UN, to all UN-member nations, and to the Director General of the WHO. It urged all leaders to: “Protect mankind and wildlife from EMFs and wireless technology.” <https://www.emfscientist.org/>

In 2015, the Canadian Parliamentary Standing Committee on Health invited international experts to testify about ‘Safety Code 6’ - Health Canada’s exposure guideline on non-ionizing radiation from cellphones, cell phone towers, cordless phones, Wi-Fi, baby monitors, ‘smart’ meters, tablet and laptop computers, and other electromagnetic sources. Almost unanimously, the experts denounced Safety Code 6 as outdated and inadequate for protecting the health of Canadians. <http://www.electrosmogprevention.org/public-health-alert/cancer-expert-warns-extremely-important-to-adopt-precaution-against-rf-exposure/>

In 2015, Dr. Anthony B. Miller, Canada’s foremost expert in radiation and cancer said, in part: “*It is important to recognize that there are no safe levels of exposure to human carcinogens.*” He also said: “radio frequency fields are not just a possible human carcinogen but a probable human carcinogen, putting it in the category 2A. It would be impossible to ignore such a hazard in regulatory approaches.” <http://www.electrosmogprevention.org/public-health-alert/cancer-expert-warns-extremely-important-to-adopt-precaution-against-rf-exposure/>

In 2014, 55 Canadian doctors condemned Safety Code 6 and called on Health Canada to protect Canadians from radio frequency (wireless) radiation exposure. <http://www.c4st.org/images/documents/hc-resolutions/medical-doctors-submission-to-health-canada-english.pdf>

In 2014, 53 scientists from 18 countries condemned Safety Code 6 and called on Health Canada to intervene to help avoid an emerging health crisis! [http://www.albany.edu/ihe/assets/Scientist\\_Declaration.pdf](http://www.albany.edu/ihe/assets/Scientist_Declaration.pdf)

In 2012, Dr. Annie J. Sasco, Ph.D., another of the world's pre-eminent EMF and cancer experts spoke out. Having spent 22 years at the WHO's cancer research facility, the International Agency for Research on Cancer (IARC), including 9 years as Group Leader and then Unit Chief of Epidemiology for Cancer Prevention, and 2 years as Acting Chief of the Cancer Control Programme of the WHO, she stated publicly: "*Despite the voices of industry-funded scientists saying otherwise there is concrete evidence that mobiles / cellphones and wi-fi cause cancer in humans.*" <http://www.safeinschool.org/2012/04/mobile-phones-are-safe-not-interview.html>

In 2006, the *Benevento Resolution*, signed by more than 40 leading experts from 16 countries, called for the application of the Precautionary Principle to avoid an emerging potential public health issue! Studies show that both extremely low frequency (ELF) and radio frequency (RF) electromagnetic fields (EMFs) can lead to cancers and a host of other diseases! [http://www.icems.eu/benevento\\_resolution.htm](http://www.icems.eu/benevento_resolution.htm)

In 2002, then IARC Director, Lorenzo Tomatis plus 30 other scientists from around the world, went public claiming IARC had let industry get too involved in the decision-making as to what is or is not cancerous <http://www.cbc.ca/marketplace/pre-2007/files/health/iarc/pagetwo.html> and <http://microwavenews.com/news-center/who-and-electric-utilities-partnership-emfs>

In 2000, Dr. Neil Cherry, Ph.D., considered to be the first Environmental Health scientist in the world to research and publish strong evidence that electromagnetic fields and radiation damage DNA and enhance cell death rates, said that they are a "Ubiquitous Universal Genotoxic Carcinogen that enhances the rates of Cancer, Cardiac, Reproductive and Neurological disease and mortality in human populations." He is credited with being the first world-class scientist to say "*There is no safe threshold level. The only safe exposure level is zero, a position confirmed by dose-response trends in epidemiological studies.*" <http://www.stayonthetruth.com/neil-cherry.php>

and [http://www.stayonthetruth.com/resources/Neil\\_Cherry/90\\_m1\\_EMR\\_Australian\\_Senate\\_Evidence\\_8-9-2000.pdf](http://www.stayonthetruth.com/resources/Neil_Cherry/90_m1_EMR_Australian_Senate_Evidence_8-9-2000.pdf)

### Media Silence

Tragically and tellingly, mainstream news media have remained largely silent on this whole sordid issue for at least 60 years.
